

# Continuing Education Monograph

## For Nurses and Pharmacists

### Intelligent Medication Administration and Patient Safety at the Point of Care: An Evaluation of Implementation and Return on Investment

This monograph will familiarize nurses with 21st century “intelligent” technology that can help enhance patient safety and provide nurses an understanding of the types of errors taking place with medication administration. New medication administration technology can potentially help prevent errors and improve practice. Nurses will learn how to analyze data reports generated with this technology to better understand current facility practice and to improve facility practice if warranted. Examples of how to make a business case for today’s “intelligent” technologies will be addressed.

#### EDUCATIONAL OBJECTIVES

Upon completion of this activity, pharmacists and nurses will be able to:

- Develop an implementation plan for bar code medication administration technology
- Develop an implementation plan for intelligent pump infusion technology
- Describe how to make a business case for intelligent technology

#### ACCREDITATION

ProCE, Inc. is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. ACPE Universal Activity Number 221-000-11-010-H05-P has been assigned to this knowledge-based home-study CE activity (initial release date 01-10-11). This program is provided at no cost to participants. Statements of credit will be issued online upon completion of the program evaluation and the post-test with a score of 70% or higher. No partial credit will be given.

Nurse CE is provided for this activity through collaboration between ProCE, Inc. and Wild Iris Medical Education, Inc. Wild Iris Medical Education, Inc. is accredited as a provider of continuing education by the American Nurses Credentialing Center's Commission on Accreditation.
