

Continuing Education Monograph
For Nurses

Keeping Lines Open: Maintaining CVC Patency

Over 5 million central venous access devices (CVADs) are inserted each year in the U.S. to deliver medications, blood products and nutrition support. Over 15% of patients with CVADs experience mechanical, infectious and/or thrombotic complications that require intervention. The purpose of this monograph is to examine the scope of CVAD complications, to outline prevention and treatment strategies for CVAD complications and to examine device technology designed to reduce CVAD complications.

EDUCATIONAL OBJECTIVES

- Upon completion of this activity, nurses will be able to:
- List and describe potential Central Venous Catheters (CVC) complications
 - Outline strategies to maintain and restore CVC patency
 - Describe advanced device technologies designed to help avoid and prevent catheter occlusions

ACCREDITATION

Nurse CE is provided for this activity through collaboration between ProCE, Inc. and Wild Iris Medical Education, Inc. Wild Iris Medical Education, Inc. is accredited as a provider of continuing education by the American Nurses Credentialing Center's Commission on Accreditation. This activity provides 1.0 contact hour of nurse CE credit.

FACULTY

Nancy Moureau, BSN, CRNI
PICC Excellence, Inc.
Rincon, GA
