

# Continuing Education Monograph

For Nurses and Pharmacists

## Security and Wireless IV Infusion Devices – Is Your System Secure?

“Intelligent” infusion pumps can enhance efficiency and accuracy in infusion administration and has a direct impact on nurses, physicians and pharmacists, as well as information technology specialists, clinical engineers, biomed and risk managers. To help you make informed decisions about wireless intelligent infusion technology in your hospital, this monograph will tell you what it is, how it works, and what it takes to secure your hospital system.

### Learning Objectives

1. Discuss the benefits of wireless smart infusion devices and considerations for deployment in the hospital
2. Describe information that can be communicated by smart infusion devices and how it can be transmitted
3. Identify the pro’s and con’s of different wireless communication protocols and security mechanisms supported by these devices
